HTML

2  
ZAPISZ NA  
KOMPUTERZE  
WERSJĘ ZIELONĄ  
DARMOWĄ

3  
ZALOGUJ SIĘ DO  
PANELU ADMINA

The screenshot shows the MYPRESTA website interface. At the top, there's a red header with the MYPRESTA logo, a currency selector (€), and a shopping cart icon showing 0.00 €. Below the header is a navigation bar with icons for search, categories, about us, contact, and articles, along with 'SIGN UP' and 'LOG IN' buttons. The main content area shows a breadcrumb trail: Shop > Modules > Front-office features. The featured product is 'Prestashop HTML box'. Its description states: 'With this module you can add to your shop "client side code" like html, javascript, css, etc. With this module you can create your own HTML block with facebook, twitter, pinterest etc. plugins by adding code of them to any place in your shop based on PrestaShop engine.' Technical details include: Shop version (1.7.x, 1.6.x, 1.5.x, 1.4.x), Available translations (multiple flags), Module version (1.6.6), and Works in PrestaShop cloud (Yes). Below the product card are several circular icons representing supported PrestaShop versions (1.7, 1.6, 1.5). To the right of the product card, there are two orange boxes: 'Download for free! For old versions of PrestaShop' and 'Download for free! For PrestaShop 1.7'. A blue box explains: 'Why two versions are available? It is because PrestaShop 1.7 has different architecture and it was necessary to release module in a separated library dedicated for new PS'. At the bottom of the product card, there are buttons for 'More info', 'Video (0)', 'Reviews', 'FAQ', 'Blog (0)', and 'Changelog'. A 'Donate' button is also present at the bottom right of the page.
